

SCROLL BAR FABRIC PROTECTORS

JUNE A. ABEL, 383 PROSPECT RD., BEREA, OHIO 44017

CLAIMS

01 (Currently amended) What I claim as my invention is a needlework accessory consisting of fabric with magnets incorporated into the ends of the needlework accessory which can be wrapped around the non-working ends of fabric that has been mounted on a scroll bar.

02 (Currently amended) The needlework accessory as defined in claim 01 wherein the magnets used are round in nature includes magnetic strips, donut magnets, square magnets, triangle magnets, magnets coated or painted, heavy duty, lightweight, large, medium, small, craft magnets and magnets with varying gauss (a measure of magnetic strength) can be used to produce the needlework accessory.

03 (Currently amended) The needlework accessory as defined in claim 01 and claim 02 wherein a metallic (containing iron) including washers, discs, slugs, or strips as one of the opposing magnets will produce the same results of securing the fabric ends together of the needlework accessory.

04 (Currently amended) The needlework accessory as defined in claim 01 wherein fabric is used can include cotton, non-cotton, vinyl, suede, leather, plastics and polyester materials to produce the needlework accessory.

05 (Currently amended) The needlework accessory as defined in claim 01 will vary in size (length, width and diameter) in relation to the size, the type of magnets used and the various sizes of scroll bars used by needleworkers.
